

ARTICLE: AQUA-PRO-FLOW
ITEM-NO.: JA7403-0-001
SYSTEM: Additive to improve the levelling properties of water-based lacquers

TECHNICAL DATA

Aqua-Pro-Flow JA7403-0-001 can be used to improve the levelling properties of Aqualine water-based paints. In addition to the levelling properties, the substrate and pore wetting is optimised.

- Colour: colourless
- Density: approx. 0,87 g/cm³

Store tightly closed in a cool, dry place. Protect from frost.

Shelf life:

JH8413-0-001: unlimited

(in the unopened original container)

STORAGE

SPECIAL GUIDANCE

- In addition to this technical data sheet, the technical data sheets of the individual products must be observed.
- Depending on the application, an addition of max. 5 % is recommended. Larger addition quantities can lead to surface defects.
- Add while stirring, then stir thoroughly.
- Before application, the suitability of the product on the desired substrate must be tested by means of a test application.

Safety guidance:

The information in this technical data sheet is based on the current knowledge and experience of PLANTAG Coatings GmbH. The product processor is not exempted from its own testing and testing of the products with regard to the intended use as well as the wealth of possible influences during processing and application. Existing laws and regulations are to be observed by the recipient of our products in their own responsibility. Labeling in accordance with the Ordinance on Hazardous Substances and Transport Law can be found in the safety data sheet. A legally binding assurance of certain properties or suitability for a specific purpose cannot be derived from our information. Recommendations deviating from the information in our technical data sheets are only binding for us if they have been confirmed in writing. Our terms and conditions are an integral part of this technical information sheet [Jun-25]
